summary

Embedded Systems Engineer with 1+ years of experience in IOT development, system integration, and protocol design for EV chargers and Vehicle tracking Device. Skilled in developing IOT solutions using RTOS, and communication protocols such as CAN, RS-485, UART, I2C, MQTT, TCP.

Education

ITS ENGINEERING COLLEGE

B.Tech, Electronics and Communications [7.6]

GREATER NOIDA

07/2019 – 07/2023

Experience

R&D Engineer at MapMyIndia IOT Lab

Jan,2024 - Current

- Responsibility for testing part of new device (JC400p, AIS140, AVN Tracker And CAR EYE)
- Responsible for operating, expanding and installing new device
- Technical support for Vehicle tracking Device
- Managing and integrating video conferencing systems
- Responsible for managing all technical aspects of the Video telematics department.
- Cloud computing functionality
- Reduced firmware upgrade downtime significantly using FTP-based FOTA

Professional Course: Design And Verification Course on following modules: -

- HDL – Verilog Implementation on FPGA
- Digital System Design using Verilog HDL
- Verification using System Verilog
- Statics Time Analysis (STA)
- Beginner in UVM
- PCB Design

Projects:

- Carry look ahead adder, carry skip adder and carry select adder.
- All Gates, Counter code, Encoder and Decoder, Flip-Flops, Register File in Verilog
- Implementation of leading one position system using FPGA
- To Develop a program for FIFO memory
- To Implement a Sequence Detector for FSM
- IOT ENABLED SMART CHARGING STATIONS FOR EV

SKILLS

HDL Programming Languages

Verilog, System Verilog

Communication Protocols

UART, SPI, I2C, CAN, BLE, Wi-Fi, RS232,

Operating Systems

Linux, Windows

Scripting Lang

Bash

Programming Languages

Embedded C/C++, Python

Network Programming

HTTP/HTTPS, MQTT, TCP, UDP, FTP

Tools

Xilinx ISE 14.7, Xilinx Vivado, EDA

Networking

IP Security, Routing, switching,
Troubleshooting, Implementing

Additional Courses:

1. System Design through Verilog (SWAYAM)
2. Static Time Analysis (UDEMY)
3. Embedded Linux Application Development

Interest:

1. Learn Methodologies based on C/CPP
2. Learn concepts of Verilog/System Verilog HDL
3. Learn Verification Methodologies like UVM
4. Learn methodologies based on Microprocessors and Micro controllers

Languages Known:

1. English
2. Hindi
